

MT 310

COMBINED ELCB / POLARITY SOCKET TESTER

- Versatility of use – safety reads polarity of plug socket including 6 important ranges for ELCB testing
- Separate momentary switch for ELCB testing, avoids unnecessary tripping of ELCB while checking polarity
- Precision accuracy of unit gives true reading of ELCB trip rate
- Separate power cord ensures user to access all plug sockets, including hard to reach points

SPECIFICATIONS

ELCB Trip ratings	10-15-20-25-30-35m
Wiring identifications	Wiring correct No earth Live and neutral reversed Neutral fault Live and earth reversed Live fault
Dimensions LWD	85 x 56 x 31mm
Accessories	Supplied complete with 15 AMP moulded plug
Typical Accuracy	
Test current	$\pm 1,75\text{mA}$ at 220V AC
Weight	250g
